

Community Land Acquisition Initiative

PLEDGE OF SUPPORT

Acquisition of *Wallum Heathland*

Lot 13 DP 1251383 Brunswick Heads NSW 2483

Target: \$35m in currency funds and Biodiversity Credits

We are seeking donors to help us buy the precious coastal heathland, Wallum (Lot 13 DP1251383 Brunswick Heads NSW 2483), one of the last remaining habitats of its kind, and home to 9 Federal EPBC-listed Threatened Species.

Wallum is currently subject to a Historic Development Approval for a housing estate. Unless we act now, this sensitive habitat will be lost forever.

The land will be held in a Conservation Land Trust with a view to preserving the ecological values in perpetuity for the greater community.

The Management Plan, devised and informed by suitably qualified ecological and cultural advisory groups, incorporating First Nations knowledge, emphasises regeneration of the existing flora and fauna species, with a focus on protecting endangered species on the land.

The future plan is for a multifaceted Environmental and Cultural Centre on the land. Financial sustainability will be achieved through eco-tourism, residencies, and potential partnerships with universities and other environmental and cultural institutions. Public access will be managed to balance conservation with education and appreciation.

Key goals include ecological preservation and regeneration of the Wallum Heathland, cultural heritage recognition, and educational opportunities ensuring the site becomes a model for environmental stewardship.

Your contributions, whether money, or in the form of biodiversity credits, serve as the cornerstone of our mission.
